PROFESSIONAL PROFILE

I am a curious individual who is motivated by challenges and joyed by overcoming them. I believe we don't really need power or influence to change the world. Sometimes, we just need to write good code, and deliver awesome products. Right now, I use WordPress and JavaScript to help make the world a better place.

WORK EXPERIENCE

Full Stack JavaScript Developer 2018-Present (Part-time)

AskSteve

- Development of additional features in both frontend and backend of a React/React Native/Nodejs Mobile app.
- Development and Improvement of Messenger Bot with Nodejs.
- Code review and unit testing.

Web Admin / Developer 2016-2018

Freelance

- Developed websites from designs/mockups using html/css/js and libraries like jQuery/React, and CMS like WordPress.
- Helped manage virtual web servers in Nginx/Apache on Digital Ocean - Ubuntu 16 and cPanel of Hosting providers
- Developed web/mobile applications for small businesses

Assistant Teacher 2017-2017

Vivix Academy (Coding Bootcamp)

- I assisted in teaching in a 6 month coding bootcamp focusing in the most in demand skills from programming fundamentals, Ruby on Rails, JavaScript and libraries like Reactjs, Nodejs, Expressjs.
- I worked closely with the students from concepts, planning, to error-handling where we developed excellent problem solving, learning and research skills.

EDUCATION

Saint Louis University 2012-2016

Mechanical Engineering

- Four years in engineering school helped me develop my problem solving skills which I now use in programming / development.

Online Resources 2014-Present

Web Development

- I learned most of my development skills from online resources together with the mentorship of experts.
